

AuthenticationSuccessHandler

```
classDiagram
    class AuthenticationSuccessHandler {
    }
    class CustomLoginSuccessHandler {
        + onAuthenticationSuccess()
    }
    CustomLoginSuccessHandler --|> AuthenticationSuccessHandler
```

The diagram illustrates a class hierarchy. At the top is the 'AuthenticationSuccessHandler' class, represented by a white box with a black border. Below it is the 'org.zerock.security.CustomLoginSuccessHandler' class, represented by a grey box with a black border. A blue arrow with an open triangle head points from the CustomLoginSuccessHandler class up to the AuthenticationSuccessHandler class, indicating that CustomLoginSuccessHandler inherits from AuthenticationSuccessHandler.

org.zerock.security.Custom  
LoginSuccessHandler

+ onAuthenticationSuccess()
